

## Why should we invest in a TimeTronics System?

### Because you deserve it.

Your athletes deserve it; with the determination, dedication and perseverance shown all year round, photo finish timing is the only reward.

Your officials deserve it, it's the 21st century, let them be free and roam in the world of these spectacular, user-friendly systems.

And most importantly *athletics deserves it*, helping the sport take that step up to the professional image, whilst opening the door to a wealth of sponsorship opportunities it craves.

### Accept your golden ticket

With TimeTronics, you are not just buying a photo finish system; you are accepting your invitation to be a focal point within the athletics world.

Want to hold meetings that everybody pencils in first? Want to be a magnet for all athletes from all corners of the country? Well now you can, with TimeTronics.

You will find a meeting easier to run than ever before. Using the exclusive software within the

new MacFinish 2D USB camera, a quick set up can be mastered in no time and with the system in place you will begin to discover its many advantages.

### Free your thumbs

Using a set of photo poles, you can sit back and enjoy the action. The camera will automatically detect and save the image of the athletes, meaning no buttons to press on arrival, guaranteeing precise and condensed images every time.

A meeting should be seen as an entertainment event, with the vast range of scoreboards, you have power to inform and engage athletes and spectators to the action like you have never seen before. Wind speed, race time and laps to go are all just the tip of the iceberg to information you can make readily accessible to everybody. The diamond in the collection, the LED scoreboard, will allow you to produce the full result of a race within minutes of the last finisher.

### Good looks are everything

Hardware is key, software is essential. The Athletics Manager software gives you full control over the smooth running of any event;

you will be amazed at the amount you can achieve at your fingertips. Display start lists, results, team scores, multi event scoring and print outs of photo finish images, all using just the one software package. Smooth data transfer means typing is kept to a minimum and live internet results is possible, being as easy to set up as connecting to the net.

### Your dream starts here

In short choosing TimeTronics photo finish equipment could be the best investment you'll ever make. Don't miss out, our tailored packages are designed to meet even the tightest of budgets and every club's needs; you're never too far away from the dream of your first photo finish meeting.
